

DSLR Digital Photo Booth

Elevate your event with our DSLR Digital Photo Booth, featuring professional-grade cameras, ring light, and extra lighting for stunning images. Easy to use with customizable extras like prints, props, and backdrops. Perfect for any occasion, ensuring unforgettable moments and lasting memories!

Space Requirements

Our photo booths need a minimum clear space of **3m x 3m x 2.4m** to operate comfortably. The operating area must be completely level and located indoors away from the weather. Please take a moment to check that your chosen location has enough room before completing your booking, especially the ceiling height.

Power Requirements

We just need access to a single standard **10A power outlet within 9 metres** of the booth's operating area. If the nearest outlet is a little further away, no problem at all — simply let our team know in advance and we'll bring an extra 25-metre extension lead with us.

Internet Connection

All our photo booths come with their own **built-in Telstra LTE connection**, so there's no need to provide Wi-Fi or any local internet on the day — we've got it covered! That said, as we're in Australia, mobile coverage can vary depending on the location. If internet access isn't available at your venue, no stress at all. The booth will continue running as normal, and any SMS guest requests or online gallery uploads will automatically send through once a connection is re-established.

Lighting

Our booths are fitted with two powerful LED wand lights and a central ring light, so there's no need to worry about additional lighting. They're designed to work perfectly on their own and can operate in complete darkness if needed, ensuring great photos in any environment.

Layouts Options

Our photo booth setup is super flexible! Depending on which fun extras you choose—like a backdrop, a props table, or instant prints—we can arrange the layout in a few different ways to suit your space. If you have a preferred setup just let one of our friendly staff know. The photo booth can be placed between 1.6-2m away from the backdrop. 1.6m away is great for 2-4 guests (recommended) while 2m away is for large groups.
